

Monitoring

Closely track your business partners

Monitoring your business partners can be difficult, especially when they're in a different country. By using the Coface Monitoring services, you can:

- › Closely track the changes in the financial health insights of your business partners (negative and positive).
- › Receive alerts to anticipate change and proactively adjust business operations.
- › Avoid credit losses or delivery issues

AVAILABLE
Urba360
API

How does Monitoring work?

- › Sends daily notifications whenever changes (value triggers) are detected.
- › Overnight, the system checks for any value changes across insights and notifications are dispatched in the morning.
- › Monitoring can be activated when the product is ordered or later.

If the company is Monitored, the notification bar appears on the top.

It shows the number of changes that have been register for this company.

Changes on the profile of the company are shown with a "new" flag on widget affected.

Monitoring: closely track your business partners

Monitoring capabilities

- Real-time data access**
 Monitor creditworthiness around the clock with real-time updates and alerts.
- Credit score dynamics**
